

YOU CAN CURE YOUR HEP C

“I thought to myself, you know what, give yourself a chance.... And so I did.”

-Stacia, Hep Free Hawai'i storyteller

GET CURED OF HEP C!

IT'S CURABLE

- Cure rates are more than 95%!
- It reduces liver disease, liver cancer, and early death
- Up to 3.9 million people in the US have Hep C

IT'S SIMPLE

- The cure is only oral pills, with no injections
- It usually takes 2-3 months, with minimal side effects
- Remember to take all your meds and get follow up labs

STAY HEALTHY

- Hep C is spread blood-to-blood: needle sticks, sharing needles, sexual activity
- You can avoid reinfection after the cure
